

CMG GardenNotes #514

Homework: *Herbaceous Plants: Right Plant, Right Place*

Evaluate your own yard for the following situations:

1. Describe the microclimates in your yard.

2. Describe the following as it relates to your own gardening experience
 - Pros and limitations of annuals

 - Pros and limitations of perennials

 - Pros and limitations of bulbs, corms and tubers

3. Describe the various exposures around your landscape.

4. Describe your natural precipitation. Based on your local water supply, what is our potential for landscape irrigation? Describe our preferences for irrigated and non-irrigated hydrozone.

5. List five flowers that have done well in your landscape.

6. List five flowers that have not done well in your landscape (explaining why).
